

AMERICA'S DEADLIEST DRUG THREAT IS HIDING IN PLAIN SIGHT

Know the Truth About Illicit Fentanyl

THERE IS NO SUCH THING AS A SAFE DOSE OF FENTANYL

It's highly addictive and just 2mg is
enough to kill

7 out of 10 fake pills contain a lethal dose

- Illicit fentanyl has been found in fake pressed pills that look like pharmaceutical-grade Percocet, Adderall, and Xanax.
- Illicit fentanyl is prevalent in all street drugs including heroin, cocaine & meth.
- Illicit fentanyl is odorless and tasteless. You won't know it's hiding in the drugs you choose to use or try.

Why take the risk? In today's drug market, it is impossible to know if a drug contains fentanyl. Even marijuana and vape pens have the potential to be laced. Do not take anything not prescribed to you by a doctor and purchased from a licensed pharmacy.

-Illicit fentanyl is a man made synthetic opioid that is highly addictive and can cause sudden death

-50x's stronger than heroin 100x's more potent than morphine

-Fentanyl poisoning is the #1 cause of death in Americans ages 18-45

KNOW THE SIGNS OF FENTANYL POISONING AND OPIOID OVERDOSE

IMMEDIATELY
CALL 911 IF YOU SUSPECT
FENTANYL POISONING
BE SAFE NOT SORRY!

**This spray can
save a life!**

CARRY NALOXONE

Naloxone (Narcan) is a medicine that rapidly reverses an opioid overdose. It can quickly restore normal breathing to a person if their breathing has slowed or stopped because of a poisoning or opioid overdose. It has no effect on someone who does not have opioids in their system, and it is not a treatment for opioid use disorder. Naloxone needs to be administered immediately, every second counts.
